■■ Nessus Vulnerability Scan Report - Task 3

This report documents the results of a basic network vulnerability scan conducted using Nessus Essentials. The scan was performed as part of a 45-day cybersecurity internship program at Elevate Labs.

Scan Details:
• **Scanner:** Nessus Essentials
• **Target IP:** 212.82.100.137
• **Status:** Completed
• **Start Time:** 5:55 PM
• **End Time:** 6:28 PM
• **Elapsed Time:** 34 minutes
• **CVSS Base:** v3.0

Vulnerability Summary:
• Total Vulnerabilities Found: 18
• Medium: 2
• Info: 16
• Critical/High: 0

Screenshots (refer to raw images in repo):

Skills Gained:
• Performing network scans using Nessus
• Analyzing and interpreting vulnerability results
• Familiarity with CVSS and reporting structures
• Documenting technical results professionally
